C3 Global uses historians to identify well underperformance

Thursday, September 01, 2011 in [Software](#)

C3 Global Ltd a company based in the Scottish Highlands focussing on improving asset and operational performance in oil and gas, reports that it won £7.5m contracts in the first half of 2011.

This means that its business has grown 20 per cent.

The company specialises in analyse the data in companies' data historians, to get a clear picture of performance and identify areas of underperformance, and help people understand what they can do to improve.

The company has 40 staff and says it has offices around the world and clients include BP, Conoco, Anadarko Petroleum, Qatar Gas, OMV Australia, Chevron, Total and Centrica.

"The North Sea is a very competitive market place and home to many ageing assets, to which our business intelligence and asset performance solutions can bring cost, time and operating efficiencies," says David Smith, CEO at C3 Global.

"We are very encouraged that interest in our services has raised among the Aberdeen based major North Sea operators and as part of our ongoing growth strategy we will continue to focus on this important market."
